SUMMARY

Backend Developer with **3 years of total experience** across ERP systems, real-time GPS/IoT operations, and full-stack web development (Next.js, Python, PostgreSQL, Power BI), plus **2 years** as a freelance mobile developer building **30+ apps** across **fintech, e-commerce, and healthcare**. Skilled in **system architecture, GPS/IoT integrations, payment systems**,

TECHNICAL SKILLS

Languages: Java, JavaScript, PHP, Python, HTML5, CSS3, SQL, Dart **Mobile:** Flutter, React Native, Android (Java), Firebase
Web: Next.js, React.js, Node.js, Express.js, RESTful APIs **Databases:** PostgreSQL, MySQL, MongoDB, SQLite, Firestore
Cloud/DevOps: Google Cloud, Firebase, Git, CI/CD
State Mgmt: Provider, Bloc, Riverpod, GetX **Payments:** DMT, AEPS, RECHARGE, BBPS, B2B APIs

EXPERIENCE

Backend Developer <i>ITG Telematics Private Limited</i>	Sep 2025 – Jul 2026 <i>Onsite</i>
- Designed and built the initial backend architecture and core system flow for Project Rakshak, establishing the API structure and data flow later extended into the company's flagship ERP platform. - Sole backend owner of a comprehensive ERP system spanning vehicle tracking, trip management, service-engineer installation & service workflows, and real-time GPS monitoring across multiple databases — from design through deployment. - Engineered high-performance GPS polling service (Node.js + MySQL) processing 10,000+ vehicle locations/min with 99.9% data availability via intelligent API failover. - Implemented APIs for vehicle registration, trip creation, real-time tracking, geofencing, delivery confirmation, and automated alerts for overspeed (80+ km/hr) and idle duration (30+ mins). - Developed Breath Analyser API to record and store driver sobriety status (drunk/sober) per trip, integrated with driver login and registration APIs for secure fleet access control. - Concurrently designed and maintained backend infrastructure for an external client project, independently managing the full API lifecycle alongside primary role responsibilities. - Optimized 4 MySQL databases with connection pooling, reducing query latency by 40% and handling 500+ concurrent connections. - Secured APIs with Basic Auth, HTTPS/SSL, CORS and request validation; built POI/route resolution with geocoding fallback via Nominatim.	
Independent Mobile Application Developer <i>Self-Employed / Freelance</i>	Sep 2023 – May 2025 <i>Patna, Bihar</i>
- Developed 30+ cross-platform mobile apps for fintech and e-commerce clients using Flutter, React Native, and Java. - Integrated payment systems (DMT, AEPS, RECHARGE, BBPS) serving 500+ daily users with 99% uptime; built fintech dashboards with PHP/HTML/CSS, reducing load times by 40%.	
AI/ML Intern <i>EJY Health</i>	Jan 2023 – Mar 2023 <i>Remote</i>
* Developed Python-based AI tools for healthcare compliance with 92% accuracy in medical report analysis.	

EDUCATION

Bachelor of Computer Applications (BCA) <i>Birla Institute of Technology, Mesra</i>	Sep 2020 – May 2023 <i>Patna, India</i>
Master of Computer Applications (MCA) <i>Amity University, Noida</i>	Nov 2025 – Present <i>Uttar Pradesh, India</i>

KEY PROJECTS

Plant Identifier AI <i>Next.js, Gemini AI</i> Live Demo	2024
* AI plant classification with 95% accuracy using computer vision and machine learning.	
MedReportScanner <i>Python, Gemini AI, NLP</i> Live Demo	2024
* AI PDF parser for medical reports with 92% accuracy , reducing processing time by 60% .	
E-commerce Flutter App <i>Flutter, Provider, Firebase</i>	2025
* Cross-platform e-commerce app with payment gateway integration and real-time inventory management.	

ACHIEVEMENTS

Impact: 15+ mobile apps deployed, 4+ payment system integrations, 100+ daily users, 95% client satisfaction
Expertise: E-commerce development, Fintech compliance, Healthcare AI, Payment security
